These are just a few rescue groups; there are many others. You can search rescues near me or by breed online.

- You can also post your pet on REHOME by Adopt-A-Pet as a private owner! This website sends automated emails to potential adopters when animals that match their requirements are posted. Make sure to include things like being housebroken and good with cats, kids, and/or dogs.
- Please also remember that when reaching out to any rescues, they are very busy and may take a few days to get back to you. To make the most of your message/email, please leave as many details as possible about your pet. Include information like age, breed, good with kids, cats, and dogs. Also, attach a photo if possible.
